The purpose of this message is to pledge support for XM Satellite Radio. I am a new customer of XM Radio, having just recently activated my service, and have been very pleased with the wide variety of listening options available. I no longer feel as though I'm constricted by my local radio options and welcome the new Satellite Radio alternatives. Also, my job requires that I travel quite frequently and I find it comforting to know that as I change listening zones from town to town, I can still enjoy same XM Radio channels throughout the country. I am speaking out against the NAB's petition 04-160 and the potential restrictions it carries for Satellite Radio. XM Satellite Radio is a service that I am willing to pay for in order to obtain more desirable listening programs and I feel as though any sanctions against the programming offered on Satellite Radio would be unjustifiable. Thank you for your time and consideration.....Ashley D. Herren
